3"	320 GPM	\$560.61	\$150,000.00
4"	500GPM	\$871.91	\$234,375.00

* Property Owner and/or Developer is responsible for all required offsite improvements required for connection. Meter will not be set until fees are paid in full. All T&M is to be billed to customer account and must be paid within the first billing cycle.

*Multi-Family developments will be billed at a 5/8" residential rate per number of livable units along with any and all other designated development related fees including but not limited to plans review fees, stock fee, and T&M.

* There will be a \$100.00 Share of Stock fee for each new service connection in addition to the above listed connection fee. Limit to one (1) share of stock per legal parcel.

* Note: All New construction will be required to install nothing less than a 1" meter to supply sufficient GPM for fire flow. It is the customers responsibility to determine if a larger meter is needed for the fire suppression system.

* The concurrent installation of two (2) or more meters must be completed by a developer, under the direct supervision of Highlands Water Company.

* All new construction is required to install a Back Flow Prevention Device.

* All new connections are required to make any and all needed upgrades to the distribution system at the time of construction.

* Any connections completed by Highlands Water Company will be billed at the actual cost of Time and Material.
